

Vladimir Foitik's Bio and Statement

Vladimir's Bio:

Vladimir is a retired Engineer with a Masters Degree in Structural Engineering from the University of Prague. He acquired Structural, Civil and Professional Engineering licenses in many states of the U.S. He worked as a Civil and Structural Engineer, Design Supervisor, Construction Inspector, and Project Manager on many different types of challenging residential, commercial, light and heavy industrial projects in Europe, Asia, and the U.S. After his retirement Vladimir resumed his enthusiasm for visual art.

In 2008 Vladimir joined the Southern Arizona Watercolor Guild (SAWG) and in 2009 was accepted as a juried member of SAWG. He participated in Annual SAWG Calendar shows at Brandi Fenton Park in 2008, 2009 and 2010, 2009 Fiesta Sonora Signature Point Show and Experimental & Innovative Works in Water Media in November 2010. In April 2010 he had a solo exhibit show in the Kirk Bear Canyon Public Library in Tucson.

Vladimir's Statement:

I was captivated by the transparency and luminescence of watercolors. It is unique to any other media, and if correctly applied, can be very rewarding. In the beginning I considered my engineering background as a minus until I realized that I can take advantage of it. Analyzing everything and understanding the principles of visual art and developing an ability to express my thought in a form of a created art must be an advantage! I am studying the different styles, techniques, and different media of the old and present masters and trying to apply everything I learn.

Presenting here are some of my pictures. To view more of them, please see my website
